Eco-tech green living for modern Indian spaces.

01 / ABOUT GREENSPACEDEV

An eco-tech green living platform for modern spaces.

GREENSPACEDEV helps people design, plan, and maintain beautiful plant-based spaces for modern homes and commercial environments.

We combine plant expertise, space planning, AI-assisted recommendations, and end-to-end installation support to make greenery practical, premium, and easy to manage.

We do not just sell plants. We help people understand which plants suit their space, where they should be placed, how they should be maintained, and how greenery can improve the look, comfort, air quality, and overall experience of a space.

MISSION

To make green living simple, intelligent, and accessible for modern urban spaces.

VISION

To become India's trusted eco-tech platform for premium green spaces, sustainable interiors, rooftop gardens, and plant-based lifestyle solutions.

02 / THE PROBLEM WE SOLVE

Urban spaces are becoming more crowded, polluted, stressful, and disconnected from nature.

Most people want greener spaces, but they do not know which plants to choose, where to place them, how to care for them, or how to build a setup that survives beyond the first few weeks.

KEY PROBLEMS

01. Plants die because they are placed in the wrong location.
02. People choose plants that do not match their light, room type, or climate.
03. Indoor air quality remains poor because the space is not planned properly.
04. Balconies and rooftops remain unused or poorly designed.
05. Commercial spaces look plain, closed, and uninspiring.
06. Clients do not know how to maintain plants after purchase.
07. Greenery is often treated as decoration instead of a planned living system.

03 / OUR SOLUTION

Complete green space solutions from consultation to design, installation, and maintenance.

GREENSPACEDEV designs greenery around the actual space, user lifestyle, sunlight, airflow, maintenance ability, and aesthetic goals.

HOW WE WORK

01. We study the space.
 02. We understand the client's needs.
 03. We recommend the right plants and layout.
 04. We design the green setup.
 05. We install it professionally.
 06. We provide care guidance and maintenance support.
-

AI GREEN SCAN

Green Scan helps users understand what kind of greenery suits their space through guided recommendations based on their needs and environment.

SPACE ANALYSIS

Space Analysis helps users evaluate their room, balcony, rooftop, or commercial area and receive personalized green planning guidance.

04 / OUR SERVICES

Premium green solutions designed around real spaces.

01. HOME PLANTATION DECORATION

Greenery planning for living rooms, bedrooms, kitchens, study areas, and indoor corners.

02. BALCONY GARDEN SETUP

Compact balcony setups using low-maintenance plants, smart placement, and space-saving designs.

03. ROOFTOP GARDEN DESIGN

Rooftop gardens that improve comfort, reduce heat, and create usable outdoor spaces.

04. GARDEN DECORATION

Decorative garden setups for homes, villas, farmhouses, entrances, pathways, and outdoor corners.

05. VERTICAL GARDENS

Space-saving green walls for offices, cafes, gyms, receptions, balconies, and premium interiors.

05 / MORE SERVICES

06. COMMERCIAL GREEN SOLUTIONS

Green solutions for offices, cafes, gyms, restaurants, real estate spaces, and commercial properties.

07. AI GREEN SCAN

AI-assisted guidance that helps users understand what kind of greenery suits their space, needs, and environment.

08. SPACE ANALYSIS

Planning support for rooms, balconies, rooftops, and commercial areas.

09. MAINTENANCE SUPPORT

Plant care guidance, checkups, seasonal suggestions, replacements, and ongoing care plans.

BUILT FOR MODERN INDIAN SPACES

GREENSPACEDEV is not a basic plant nursery or decoration service.

It is a green space planning and eco-tech platform built around personalization, design quality, and long-term plant survival.

06 / OUR PROCESS

A clear five-step path from confusion to a living green space.

01. CONSULTATION

We understand the client's space, goals, budget, sunlight conditions, design preference, and maintenance capacity.

02. SPACE STUDY

We evaluate light, airflow, usage, greenery opportunities, and visual balance.

03. CUSTOM GREEN PLAN

We prepare recommended plants, layout direction, placement ideas, and service suggestions.

04. DELIVERY AND INSTALLATION

Our team delivers and installs the selected plants and setup with proper placement, soil, planters, and finishing.

05. CARE AND MAINTENANCE

We guide the client on plant care and offer maintenance support to keep the green space healthy.
